

Ricardo Gonzalez Becerra

Software Engineer | Full Stack Developer

State of Mexico, Mexico | +52 55 1201 7729 | richglez.dev@gmail.com

<https://www.linkedin.com/in/richglez-dev/> | <https://github.com/richglez> | <https://richglez.vercel.app/>

PROFESSIONAL SUMMARY

Software Engineer with hands-on full-stack development experience built through a professional internship and independent, production-style personal projects. Proficient in Java/Spring Boot, Node.js/NestJS, Python/FastAPI, React/TypeScript, PostgreSQL, and Docker. Experienced in JWT/RBAC authentication, Dockerized environment setup, and applying SOLID principles and Clean Code practices to build maintainable, testable software.

TECHNICAL SKILLS

Backend: Spring Boot, NestJS, Node.js/Express, FastAPI, Django, .NET, ASP.NET Core

Languages: Java, JavaScript/TypeScript, Python, PHP, C#

Frontend & Mobile: React.js, Next.js, React Native, Angular, Vue.js, TypeScript, Vite, HTML5/CSS3, Tailwind, Bootstrap

State Management: Zustand, Context API

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, JPA/Hibernate

APIs & Security: REST APIs (Representational State Transfer), JSON, JWT (JSON Web Token), RBAC (Role-Based Access Control), Spring Security, BCrypt, Swagger/OpenAPI, SOAP (basic, XML)

Testing: Unit Testing, Integration Testing, JUnit, Mockito, Pytest, AAA pattern (Arrange-Act-Assert)

DevOps, CI/CD (Continuous Integration/Continuous Deployment) & Tools: Docker, Docker Compose (YAML), GitHub Actions (YAML), Git, GitHub, Vercel, Railway, Linux, Bash, Postman, pgAdmin, Maven, Gradle, npm, pnpm

IDEs & Environments: IntelliJ IDEA, VS Code, Visual Studio, Cursor, Android Studio

Methodologies: Agile/Scrum/Kanban, MVC (Model-View-Controller), OOP (Object-Oriented Programming), Layered Architecture, SOLID, Clean Code

AI-Assisted Development: GitHub Copilot, Claude Code, Codex, OpenCode, DeepSeek, Gemini CLI

WORK EXPERIENCE

CEPCAM – Centro de Cuidados Paliativos de México

June 2024 – January 2025

Full Stack Developer Intern | State of Mexico, Mexico

- Developed and maintained a patient, caregiver, and medical services management platform for a palliative care organization, implementing new features across frontend and backend using Angular, Node.js, Express, and MySQL.
- Identified slow query performance affecting patient search and resolved it by implementing indexing and dynamic filtering.
- Automated administrative reporting by implementing Excel export functionality, eliminating repetitive manual report generation.
- Collaborated with stakeholders in weekly development cycles to refine requirements and deliver incremental full-stack features, adapting to evolving project needs.
- Applied a client-server architecture with separation of controllers, routes, and models, improving system maintainability and scalability.

EDUCATION

Universidad del Valle de México (UVM)

August 2020 – June 2025

Bachelor's Degree in Computer Systems Engineering | Graduated | State of Mexico, Mexico

CERTIFICATIONS

- Master AI with Gemini — Santander Open Academy (Google) | Issued June 2026
- CCNAv7: Enterprise Networking, Security, and Automation | Issued July 2024
- CCNAv7: Switching, Routing, and Wireless Essentials | Issued February 2024
- CCNAv7: Introduction to Networks | Issued July 2023

PROJECTS

Hotel Management Platform

March 2026 – Present

Java • Spring Boot • React/TypeScript • PostgreSQL • Docker • JWT • Spring Security • JUnit/Mockito

Production-ready hotel management platform designed following enterprise software development practices including layered architecture, automated testing, CI/CD, JWT authentication, Dockerized infrastructure, and cloud deployment.

- Built a REST API with 20+ endpoints across Auth, Users, Rooms, and Reservations modules, applying MVC architecture (Controller-Service-Repository) and OOP/SOLID principles to keep code decoupled and maintainable.
- Secured endpoints with JWT authentication and RBAC using Spring Security to control access based on user roles.
- Developed unit and integration tests for the service and controller layers using JUnit 5, Mockito, and MockMvc with mocked Spring Security authentication, covering reservation validation logic and room-lookup exception handling.
- Standardized the development environment with Docker Compose, integrating Spring Boot, Nginx, and PostgreSQL to streamline local execution and testing.
- Implemented CI/CD pipelines with GitHub Actions to run automated tests and validate the build on every pull requests.
- Deployed the application to production via Railway, provisioning a cloud PostgreSQL database, and documented all endpoints with Swagger/OpenAPI, including the Bearer authentication scheme.

Task Management System

June 2025 – Noviembre 2025

NestJS • TypeScript • PostgreSQL • Prisma ORM • JWT • Swagger/OpenAPI • Docker

REST API with JWT authentication, role-based authorization, and a scalable backend architecture.

- Developed a secure REST API with 12 endpoints for task and user management using NestJS and PostgreSQL, applying a modular MVC approach (Controllers, Services, Modules) and OOP principles to separate concerns.
- Implemented JWT authentication and RBAC (ADMIN/USER roles) using custom Guards and the `@Roles()/@CurrentUser()` decorators.
- Implemented a soft-delete strategy using `deletedAt` fields and filtered queries in Prisma to preserve relationships between entities.
- Deployed the full infrastructure via Docker Compose with secure credential management based on `.env`, and documented the API with Swagger/OpenAPI.

Chatbot Simulator

March 2025 – May 2025

Python • FastAPI • React/TypeScript • Pytest • Docker

Locally hosted chatbot service integrating FastAPI with a Hugging Face DialoGPT model.

- Built a chatbot API using FastAPI and a Hugging Face DialoGPT model to simulate real-time conversations, running entirely locally with zero paid APIs.
- Connected a React/TypeScript/Vite frontend to the Python backend via REST, demonstrating full end-to-end integration.
- Ensured code quality with Pytest unit tests validating REST endpoint behavior and model response contracts.
